THE LUSTRES

This superior group, beginning with Blue Lustre, is now expanded to the four Hybrids listed below. All have waved petals, all have compact, low-growing plants, all produce well under a wide range of climatic conditions.

Salmon Lustre. While the exact color of an individual flower is hard to define, the garden effect of this new and beautiful Lustre is a rich salmon-pink. Plants grow only a foot tall, spread to two feet across, and produce steadily over the whole plant area right through the season.

Rose Lustre. A brand new Hybrid, and with a strong rose-pink color unique in its class. It is hard to imagine how brilliant, how commanding these flowers can be, but comparison with others is most convincing. Blooms are 3½ inches across, waved and lightly fringed, and with a light yellow throat.
